1. The National Motor Freight Classification (NMFC) may be referenced from time to time herein or in other Peninsula written documents as the NMFC, NMF100 Series or Class IT (Web based NMFC).
2. Peninsula Truck Lines, Inc. may be referenced from time to time herein or in other Peninsula written documents as Peninsula, Peninsula Truck Lines, PENS or carrier.

**140 APPLICATION / DETERMINATION OF RULES, RATES, CHARGES AND/OR CLASSES**

**1. Scope of Application:**

This Rules Tariff governs and applies only to contracts, rate agreements, and rate tariffs of Peninsula Truck Lines, Inc. which make reference to it. Any references to rates or charges "published in this Tariff" apply only to those pricing documents mentioned. The only rates or charges found herein are accessorial charges.

Except as otherwise specifically provided, rates published in this Tariff:

- a. Are named in cents per 100 pounds;
- b. Apply to or from cities and other locations within the areas defined as "Pickup and Delivery Limits" as provided in Item 745 in the carrier's Governing Rules Tariff;
- c. Are for truck and driver ONLY. See Item 560 – Extra Labor in the carrier's Governing Rules Tariff;
- d. Are applicable ONLY when using Zip Codes for actual shipping and receiving facilities as shown in the National 5 Digit Zip Code and Post Office Directory issued by the United States Postal Service.

**2. Density On Mixed Shipments / Unidentifiable Freight:**

Where the descriptions on the freight bill do not adequately provide enough information to properly classify the freight or a single shipment which consists of articles subject to two or more different commodity descriptions which are not accurately identified on the Bill of Lading are tendered to Carrier, applicable class will be determined based on the density of the total shipment as shown below.

**ACTUAL DENSITY**

If Density is:	Apply Class for rating purposes:
Less than 1 pcf	400
1 pcf but less than 2 pcf	300
2 pcf but less than 4 pcf	250
4 pcf but less than 6 pcf	150
6 pcf but less than 8 pcf	125
8 pcf but less than 10 pcf	100
10 pcf but less than 12 pcf	92.5
12 pcf but less than 15 pcf	85
15 pcf but less than 22.5 pcf	70
22.5 pcf but less than 30 pcf	65
30 pcf but less than 35 pcf	60
35 pcf but less than 50 pcf	55
50 pcf or greater	50

**3. Calculation of Density:**

Density will be calculated utilizing the total weight of the shipment divided by the total cubic feet of the entire shipment.

**4. Default Classification:**

Where the descriptions on the freight bill do not adequately provide enough information to properly classify the freight and carrier is unable to determine classification or density, the shipment shall be rated as class 150. Upon satisfactory proof of the actual class, adjustment shall be made.

**5. Descriptive Headings / Individual Listings:**

Where descriptive headings or individual listings shown in this Tariff and in the carrier's governing Rules Tariff correspond to the descriptive headings or individual listings used in the governing National Motor Freight Classification, such descriptive headings or individual listings will be understood to include all notes or other qualifying statements which appear in connection with such corresponding headings or listings in the governing National Motor Freight Classification. Where notes or other qualifying statements in the governing National Motor Freight Classification refer ONLY to "ratings", such reference will also be taken to refer to "Rates" in this Tariff.

**6. Superiority of Documents:**

Where a Bill of Lading is in conflict with this Publication or a Peninsula issued Customer Pricing Publication, in all cases this Publication and the Peninsula issued Customer Pricing Publication shall prevail.

**7. NMFC Truckload:**

The ratings or classes in connection with the NMFC truckload (TL) designation do NOT apply.

**8. Application of Accessorials and Additional Charges:**

Accessorials and additional charges will be assessed based upon the rules contained in this publication, when requested/required by the Shipper/Consignee/3d party and/or when service is performed by Carrier personnel. Peninsula Truck Lines often uses electronic means (i.e. handheld units, electronic timestamps, wireless communication, etc.) to capture data/information used to access accessorial and additional charges. The lack of notations on the delivery receipt is NOT an indication an accessorial or additional service was not performed and is NOT an acceptable reason for non-payment. Statements on bills of lading attempting to exempt parties from accessorial or additional charges or requests for notification approval will not be recognized or honored.

**9. Return Freight:**

For negotiated return pricing to apply, the original Peninsula Truck Lines pro number the freight initially moved under MUST be referenced.

**10.** Additional services performed/requested may affect standard transit times.

(Multiply the negotiated pallet rate by the factor provided below)

Length (longest Dim)	Width (Shorter Dim)				
	1-48"	49-60"	61-72"	73-84"	85-96"
1-48"	1.000	1.250	1.500	1.750	2.000
49-60"	1.250	1.875	2.250	2.625	3.000
61-72"	1.500	2.250	2.625	3.063	3.500
73-84"	1.750	2.625	3.063	3.500	4.000
85-96"	2.000	3.000	3.500	4.000	4.000
97-108"	2.250	3.375	4.500	4.500	4.500
109-120"	2.500	3.750	5.000	5.000	5.000
121-132"	2.750	4.125	5.500	5.500	5.500
133-144"	3.000	4.500	6.000	6.000	6.000

e.g. If the oversized pallet is 48" x 60" the rate would be the negotiated pallet rate x 1.25 (125%)

e.g. If the oversized pallet is 96" x 60" the rate would be the negotiated pallet rate x 3.00 (300% or three pallet spots)

When the weight of the freight exceeds the maximum allowable weight per pallet, the charged rate shall be increased based on the percentage overweight.
